	Examiner Matthew F DeSanto	Art Unit 3763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on 11/22/04 is acknowledged. The traversal is on the ground(s) that species are not patentably distinct. The examiner agrees with the applicant, and withdraws the Species election, but keeps the method and apparatus restriction.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 12-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/22/04.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Davey et al. (USPN 6,595,966).

Davey et al. discloses a multilumen catheter with an elongated body having a proximal end and a distal end, a first lumen (212) having a sidewall, a first distal opening, a first guide-wire opening, and a second lumen (106) with a second opening (45), and a second guide-wire opening, wherein the catheter further comprises a hub connected to the proximal end of the body (Figure 5D, 13 and entire reference)

The guide-wire openings are discussed in Column 9, lines 29-33 as well as can be seen in Figures 14A, 14B.

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin (USPN 5,405,341).

Martin discloses a multilumen catheter with an elongated body having a proximal end and a distal end, a first lumen (30) having a sidewall, a first distal opening (46), a first guide-wire opening (52), and a second lumen (28) with a second opening (44), and a second guide-wire opening (50), wherein the catheter further comprises a hub connected to the proximal end of the body (Figure 1, 4 and entire reference)

Conclusion

6. The prior art not relied upon is considered pertinent to applicant's disclosure is Zawacki et al. US Pub 2004/0167463, this reference cannot be used as prior art because this application has a provisional application, and thus beats the filing date of the reference.
